Corporate Social Responsibility

Every employer has some duty towards his employees as well as the society. To lessen the harmful effects on local environment and to the surrounding community is also major concern.

Environmental measures

Our Industry always try to consume energy and raw materials in an efficient manner. By doing so the company can be profitable and environmental friendly as we believe.

Provision of health and safety

We always try to ensure safe usage of machine and equipment by our workers and we provide proper training for that. This reduces different occupational hazards, unwanted accident or injuries. We also try to provide a good natural environment in the surrounding areas of the factory which paves the way to provide a good environment inside.

Human Resource

We invest in training Managers and Supervisors, a company strategy to improve factory efficiency. Where workers can be productive and work to the best of their ability. Good lighting and ventilation, clean toilets, equipments that is safe to use, safe products, safe working condition attracts our customers and lower the internal cost of accidents.

We have arranged provisions of rations for our works. We strictly prohibited child labor and has made safety our top priority. We also have well trained and motivated managers and staffs who prompt good working environment and sound relation with the workers. Also efficient use of materials, land, water and energy is part of our CSR. Our company is also socially aware. We have already started providing aid to the orphanages in rural areas. We are trying to provide proper accessibility to the workers by providing the work place at their surrounding areas.
